AI DIABETES PREDICTOR SYSTEM

POSTER

PROJECT OVERVIEW

This project is a AI Diabetes Predictor System , designed to predict weather a person/patient is at risk of having diabetes or not.

TARGET USERS

This project will be used by clinics, pharmacies and healthcare awareness programs to test and help raise awareness about diabetes and it's symptoms.

FEATURE 1

A non-invasive screening without a need for blood tests. Just 21 lifestyle indicator inputs from the patient.

FEATURE 2

The program gives a result of 1 for positive or 0 for negative quickly within a few seconds.

FEATURE 3

The program will ask easy-to-understand questions, and ensure users are guided to proper medical care if they test positive.
